

Dear Resident,

G3 Canada Limited is evaluating the potential to develop a state-of-the-art primary grain elevator, on a site east of Vermilion.

The proposed facility would be feature fast truck unloads and a loop track design that would allow trains to remain intact and load quickly. The facility is designed to have a storage capacity of up to 34,000 tonnes, and utilize industry leading dust mitigation techniques.

Pending regulatory approvals and a final investment decision, construction would take approximately 18 months to complete.

G3 looks forward to the opportunity to show area farmers what we can offer their business, and to potentially become part of the Vermilion community.

G3 will host a public open house to provide more details and answer questions about the project.

Please join us at:  
1:30pm on Wednesday, August 8th  
Legion Hall  
5144 Railway Ave.  
Vermilion, AB

Regards,
