

2021 Order Request for 2% Liquid Strychnine Concentrate Purchase

Under the authority of the Pest Control Products Act, Health Canada has cancelled registration of 2% liquid strychnine (2% LSC) used to control Richardson's Ground Squirrels. The product will be phased out: final production of 2% LSC will end March 4, 2021 and the product will be fully banned from use on March 4, 2023.

The County of Vermilion River's 2021 2% LSC sale will be by pre-order only. County Agricultural producers have until **June 30, 2020** to order strychnine for pick up and payment over the winter/spring of 2021. Producers must pre-order their product for 2021 – the County will not have additional strychnine available for sale to producers who have not pre-booked. Price for 2021 will be based on the County's purchase price, but is anticipated to be at least \$12.25/bottle (\$294/case) including GST. Buyers will be contacted when product is available – please indicate best method to contact you below.

Order Date: _____, 2020
